T.; Schreiber, Martin P., and Frame, George W., coordinators. Jamaica Bay Ecosystem Research and Restoration Team (JABERRT) Final Report : March 2002 [computer file]. Staten Island, NY: U.S. Department of Interior, National Park Service, Gateway National Recreation Area, Division Natural Resources; [2003]; 1 computer laser optical discs ; col. ; 4 3/4 in..

Keywords: JABERRT/ Jamaica Bay Ecosystem

Call Number: JABERRT-4

Notes: Preparation of the maps and CD version; Kathryn Mellander and Abbe Schreiber.

Publication date March 19, 2003.

Abstract: v. 1. concerns the identification, surveying, and restoration of 12 sites within the Jamaica Bay Wildlife Refuge as part of a cooperative project between the NPS, USACE, and Brooklyn College AREAC. The study identified here summarizes the results of a 12 month water quality sampling survey beginning in May 2000 of Jamaica Bay. -- v. 2. concerns the identification, surveying, and restoration of 12 sites within the Jamaica Bay Wildlife Refuge as part of a cooperative project between the NPS, USACE, and Brooklyn College AREAC. The study identified here examines the suitability of Jamaica Bay ecosystems for horseshoe crab -- v. 3. concerns the identification, surveying, and restoration of 12 sites within the Jamaica Bay Wildlife Refuge as part of a cooperative project between the NPS, USACE, and Brooklyn College AREAC. The study identified here is a bibliography of Jamaica Bay-related research documents.

JAMAICA BAY

- Shumon, Brian. Jamaica Bay, a study fo morphodynamics and problems of erosion and flooding. [n.d.].

Keywords: Jamaica Bay

Call Number: GB457.6 S53

Notes: no information is given on who Brian Shumon is and when the report was written or the year.

Abstract: "This is study of the coastal processes that have crated Jamaica Bay, an estuarian embayment on the south shore of Long Island. The present processes of morphology and some local problems will be examined. Jamaica Bay is a unique coastal ecosystem, located in the middle of the New York Metropolitan area. Components of the development of the bay range from the glaciation of the Ice Age on Long Island to the urban pressures that inturde upon the bay today.
